JeremyBytes.com

Bosses Hate Tests

Production Code

```
1  using ...
10
11 namespace Module.Catalog
12 {
13     public class CatalogViewModel : INotifyPropertyChanged
14     {
15         Fields
30
31         Properties
126
127         Constructors
135
136         Methods
251
252         INotifyPropertyChanged Members
263     }
264 }
265
```

Test Code

```
1  using ...
11
12 namespace Module.Catalog.Test
13 {
14     [TestClass]
15     public class CatalogViewModelTest
16     {
17         Test Initialization
116
117         Model Initialization
148
149         Catalog Population
182
183         Service Exception
240
241         Catalog Caching
287
288         Filters
355
356         Filter Reset
418
419         Catalog Item Selection
534
535     }
536 }
```

Is Typing Really Our Limitation?

Different Kinds of Tests

- Unit Tests
- Integration Tests
- Performance Tests
- Exploratory Tests
- Penetration Tests
- User Acceptance Tests

What are Unit Tests?

A unit test is an automated piece of code that invokes a unit of work in the system and then checks a single assumption about the behavior of that unit of work.

The Art of Unit Testing by Roy Osherove

What are Unit Tests?

A unit test is an automated piece of code that invokes a unit of work in the system and then checks a single assumption about the behavior of that unit of work.

automated piece of code

a unit of work

**checks a single
assumption**

The Art of Unit Testing by Roy Osherove

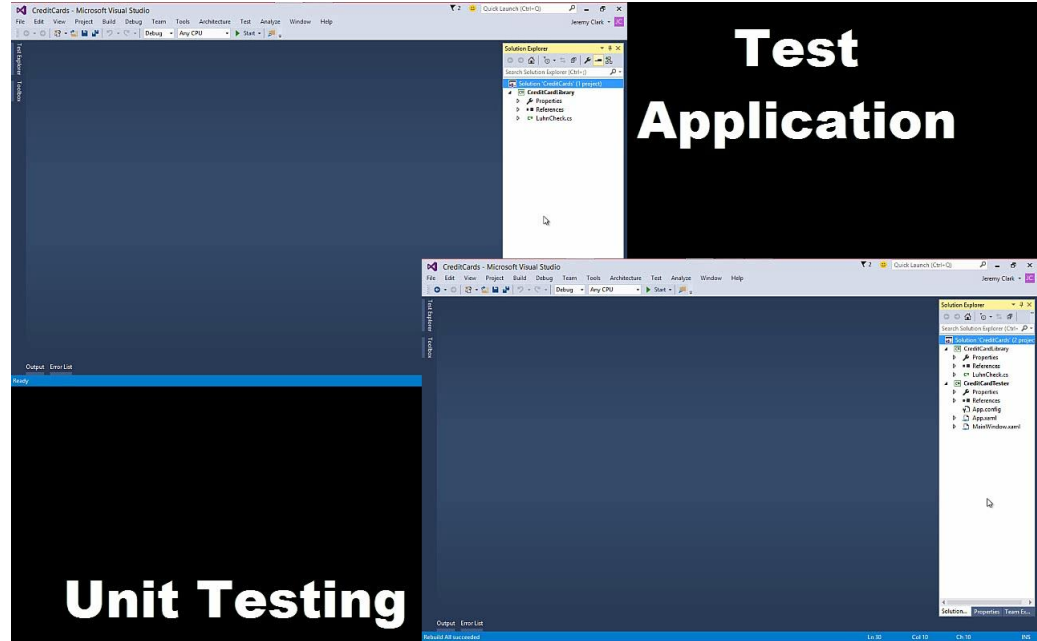

What Makes Me Faster?

- Confirming Functionality
- Checking Regression
- Pinpointing Bugs
- Documenting Functionality

Confirming Functionality

Unit Tests are ***proof*** that my code
does what I ***think*** it does

Build Time Comparison

Disclaimer

We get these advantages when we are ***comfortable*** writing ***good*** tests.

Realistic Expectations

Checking Regression

The screenshot displays the Visual Studio IDE with the Test Explorer on the left and the Code Editor on the right. The Test Explorer shows 15 passed tests for the LuhnCheck class, including tests for invalid and valid card numbers. The Code Editor shows the implementation of the LuhnCheck class in LuhnCheck.cs, which includes a static method PassesLuhnCheck that implements the Luhn algorithm.

Test Explorer (Passed Tests):

- PassesLuhnCheck_OnInvalidNumber_ReturnsFalse("-01233454567") < 1 ms
- PassesLuhnCheck_OnInvalidNumber_ReturnsFalse("123") < 1 ms
- PassesLuhnCheck_OnInvalidNumber_ReturnsFalse("7147894289") 8 ms
- PassesLuhnCheck_OnInvalidNumber_ReturnsFalse("9876543210987654") < 1 ms
- PassesLuhnCheck_OnInvalidNumber_ReturnsFalse("abc") < 1 ms
- PassesLuhnCheck_OnValidNumber_ReturnsTrue("3530111333300000") < 1 ms
- PassesLuhnCheck_OnValidNumber_ReturnsTrue("3566002020360505") < 1 ms
- PassesLuhnCheck_OnValidNumber_ReturnsTrue("371449635398431") < 1 ms
- PassesLuhnCheck_OnValidNumber_ReturnsTrue("378282246310005") < 1 ms
- PassesLuhnCheck_OnValidNumber_ReturnsTrue("401288888881881") < 1 ms
- PassesLuhnCheck_OnValidNumber_ReturnsTrue("4111111111111111") < 1 ms
- PassesLuhnCheck_OnValidNumber_ReturnsTrue("5105105105105100") < 1 ms
- PassesLuhnCheck_OnValidNumber_ReturnsTrue("5555555555554444") < 1 ms
- PassesLuhnCheck_OnValidNumber_ReturnsTrue("6011000990139424") < 1 ms
- PassesLuhnCheck_OnValidNumber_ReturnsTrue("6011111111111117") < 1 ms

Code Editor (LuhnCheck.cs):

```
public static class LuhnCheck
{
    public static bool PassesLuhnCheck(string cardNumber)
    {
        try
        {
            int[] DELTAS = new int[] { 0, 1, 2, 3, 4, -4, -3, -2, -1 };
            int checksum = 0;
            char[] chars = cardNumber.ToCharArray();
            for (int i = chars.Length - 1; i > -1; i--)
            {
                int j = ((int)chars[i]) - 48;
                checksum += j;
                if (((i - chars.Length) % 2) == 0)
                    checksum += DELTAS[j];
            }
            return ((checksum % 10) == 0);
        }
        catch (Exception)
        {
            return false;
        }
    }
}
```

Regression Comparison

Test Application

Unit Testing

```
using System; Code stolen from https://urb-of-knowledge.blogspot.com/2009/08/extremely-fast-1
public class LuhnCheck
{
    public static bool PassesLuhnCheck(string cardNumber)
    {
        try
        {
            int[] DELTAS = new int[] { 0, 1, 2, 3, 4, -4, -3, -2, -1, 0 };
            int checksum = 0;
            char[] chars = cardNumber.ToCharArray();
            for (int i = chars.Length - 1; i > -1; i--)
            {
                int j = ((int)chars[i]) - 48;
                checksum += j;
                if (((i - chars.Length) % 2) == 0)
                    checksum += DELTAS[j];
            }
            return ((checksum % 10) == 0);
        }
        catch (Exception)
        {
            return false;
        }
    }
}
```

Test Explorer

Summary

Test Run Failed (Total Run Time: 00:00:01)

- 2 Tests Failed
- 2 Tests Passed

Pinpointing Bugs

The screenshot displays the Visual Studio IDE with the Test Explorer on the left and the source code of `CatalogViewModel.cs` on the right.

Test Explorer:

- Failed Tests (6):**
 - `CatalogViewModel_OnInitialization_ModelIsPopulated` (161 ms)
 - `ModelSelectedItems_AddToSelectionWithExistingPerson_SelectionIsUnchanged` (2 ms)
 - `ModelSelectedItems_AddToSelectionWithNewPerson_PersonAdded` (3 ms)
 - `ModelSelectedItems_RemoveFromSelectionWithExistingPerson_PersonRemoved` (1 ms)
 - `ModelSelectedItems_RemoveFromSelectionWithNewPerson_SelectionIsUnchanged` (1 ms)
 - `ModelSelectedPeople_OnClearSelection_IsEmpty` (1 ms)
- Passed Tests (13):**
 - `Catalog_FilterDoesNotInclude00s_00sRecordsIsNotIncluded` (< 1 ms)
 - `Catalog_FilterDoesNotInclude70s_70sRecordsIsNotIncluded` (1 ms)
 - `Catalog_FilterIncludes00s_00sRecordsIsIncluded` (< 1 ms)
 - `Catalog_FilterIncludes70s_70sRecordsIsIncluded` (1 ms)
 - `CatalogService_OnRefreshAndCacheExpired_ServicesCalledTwice` (31 ms)
 - `CatalogService_OnRefreshAndCacheNotExpired_ServicesCalledOnce` (1 sec)
 - `CatalogViewModel_OnInitialization_CatalogIsPopulated` (1 ms)
 - `CatalogViewModel_OnInitializationAndCurrentOrderMissing_ThrowsException` (1 ms)
 - `CatalogViewModel_OnInitializationAndPersonServiceMissing_ThrowsException` (< 1 ms)
 - `CatalogViewModel_OnInitializationWithNoServiceException_DoesNotThrowException` (198 ms)
 - `CatalogViewModel_OnInitializationWithServiceException_ThrowsExceptionOnClearSelection` (2 ms)
 - `Filters_OnRefreshAndCacheExpired_AreResetToDefaults` (1 ms)

Summary:

- Last Test Run Failed (Total Run Time 0:00:03)
- 6 Tests Failed
- 13 Tests Passed

Source Code (CatalogViewModel.cs):

```
#region Methods

public void Initialize()
{
    _service = GetServiceFromContainer();
    GetModelFromContainer();

    RefreshCatalog();
}

private CatalogOrder GetModelFromContainer()
{
    if (!_container.IsRegistered<CatalogOrder>("CurrentOrder"))
        throw new MissingFieldException(
            "CurrentOrder is not available from the DI Container");
    return _container.Resolve<CatalogOrder>("CurrentOrder");
}

private IPersonService GetServiceFromContainer()
{
    if (!_container.IsRegistered<IPersonService>())
        throw new MissingFieldException(
            "IPersonService is not available from the DI Container");
    return _container.Resolve<IPersonService>();
}

public void RefreshCatalog() { ... }

private void RefreshCatalogFromService() { ... }
```

We get these advantages when we are ***comfortable*** writing ***good*** tests.

Good Unit Tests

- Maintainable
- Dependable
- Runnable

Qualities of a Good Test

Maintainable

- Not Tricky
- Easy to Read
- Easy to Write
- Well-Named

Dependable

- Consistent Results
- Isolated
- Continued Relevance
- Tests the Right Things

Runnable

- FAST

Michael C. Feathers on Speed

“A unit test that takes $1/10^{\text{th}}$ of a second to run is a slow unit test.”

“Unit tests run fast. If they don't run fast, they aren't unit tests.”

Working Effectively with Legacy Code by Michael C. Feathers

Qualities of a Good Test

Maintainable

- Not Tricky
- Easy to Read
- Easy to Write
- Well-Named

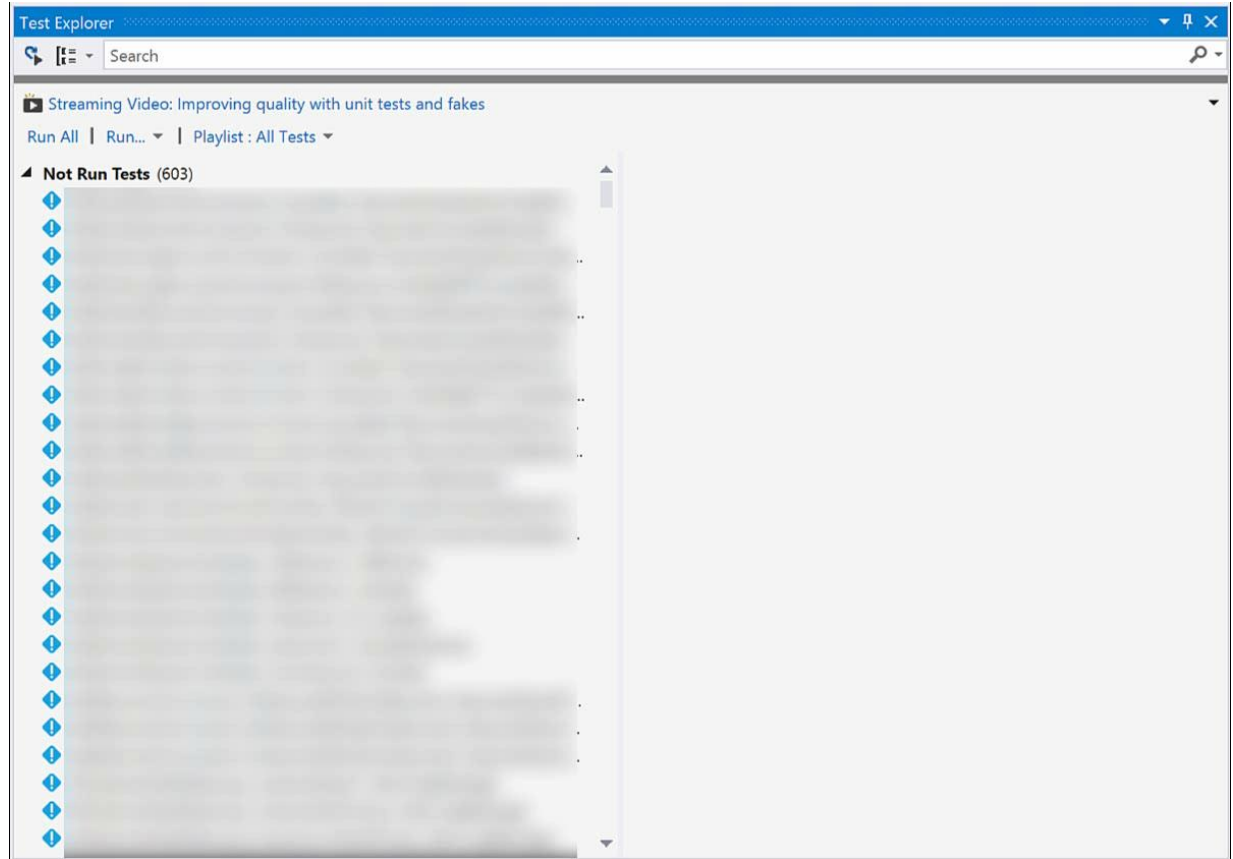

Dependable

- Consistent Results
- Isolated
- Continued Relevance
- Tests the Right Things

Runnable

- FAST
- Single Click
- Repeatable
- Failure Points to the Problem

Isolated and Fast

Code Coverage

100% Code Coverage
is not a guarantee

Conversation about Code Coverage

“What parts of your application are
okay ***not*** to test?”

The Stahl Standard

“What parts of your application do your users ***not*** care about?”

-Barry Stahl

Twitter: @bsstahl

<http://www.cognitiveinheritance.com/>

Know the Goals

- Don't do the right thing for the wrong reason.
- Unit testing will not fix bad development practices.

<http://www.jenders.com/2012/01/08/thief-almost-caught-on-camera-stealing-thin-lg-television/>

Martin Fowler on Fear

“Don’t let the fear that testing
can’t catch ***all*** bugs
stop you from writing the tests
that will catch ***most*** bugs.”

Refactoring by Martin Fowler et al.
